HAMMAM AL ANDALUS TOWARDS INTEGRAL HEALTH

Looking for the state of personal, emotional and social well-being of an individual in harmony with nature and the development of human values.

Redesigning our strategic plan

We are going from being an Arab baths company to being the company to boost your health, your well-being and your balance, from the perspective of a “sense of belonging” towards the Community.

HELYSIA

A token to strengthen the existing community of Hammam Al Ándalus sympathisers who believe that technology as a means to promote human values is necessary and desirable. A community that now more than ever is concerned about its own health, and that of its loved ones and the planet, a community aligned with the triple commitment of integrated health:

1. The relationship with nature
2. The relationship with others, with the world
3. The relationship with one's self

The token will strengthen the growth strategy for:

1. Product: Marking us out, supported by the Science+Innovation relationship.
2. Spaces: through a national and international expansion plan.
3. Permanent technological/digital development and progress.
4. The development of a prosperous community culture supported by training and the exchange of experiences in the groups of : employees and civil society led by loyal customers who recommend the lifestyle implicit in the Hammam Al Ándalus experience.

The sale of the token represents a right to redeem it against services and products that benefit the parties participating in the purchase in the following way:

- Hammam Al Ándalus obtains resources for the aims established through the presale of its services.
- The user benefits from the services and products offered by Hammam Al Ándalus through discounts and exclusive offers, which will be greater in accordance with the number of tokens possessed by the user.
